

Akil Tajwar Chowdhury

Full Stack Engineer

Address: Anderkillah, Chattogram, Bangladesh

Phone: +8801871844629

Email: akiltajwar@gmail.com

[GitHub](#) | [Portfolio](#) | [Facebook](#) | [LinkedIn](#)

Full Stack Engineer (TypeScript | Next.js | Node.js) with experience building and owning production-grade web applications from database design to deployment in fast-paced startup environments. Comfortable working with complex codebases, API integrations, and delivering features end-to-end.

Skills

Programming Language: JavaScript, TypeScript, C, C++

Full Stack: Next.js, React.js, Node.js, Express.js

Databases: MySQL, MongoDB, Mongoose, SQLite, Drizzle ORM

Tools: Docker, GitHub, Vercel, Firebase

Projects

Please visit my GitHub for additional projects and source code samples.

Benign Fashion (E-commerce Platform – Solo Project)

Live: [Benign Fashion](#)

Stack: Next.js, TypeScript, Express.js, MySQL

- Designed and developed a full-stack e-commerce platform from database design to production deployment.
- Built secure authentication and authorization workflows for customers and administrators.
- Developed RESTful APIs for product management, category management, order processing, and user operations.
- Designed and implemented relational database schemas for products, users, orders, and inventory management.
- Created an admin dashboard for managing products, categories, and order lifecycles.
- Implemented complete shopping cart and checkout workflows with responsive user experience across devices.
- Built order tracking functionality supporting pending, confirmed, and completed order states.
- Delivered a fully responsive application optimized for desktop, tablet, and mobile devices.

Safara: (Online Learning Management System – Team project)

Live: [Safara](#)

Stack: React.js, Node.js, Express.js, MongoDB, Mongoose

- Contributed to the development of a scalable learning management platform supporting students, instructors, and administrators.
- Implemented secure authentication using email/password and Google OAuth.
- Developed backend APIs for course management, enrollment workflows, media uploads, and user management.
- Built features enabling instructors to create and manage courses with videos, PDF resources, and quizzes.

- Designed role-based access control for administrators, instructors, and students.
- Implemented course review and rating systems to improve student engagement and decision-making.
- Developed quiz and assessment modules with automated scoring and answer validation.
- Built certificate generation workflows for students upon successful course completion

CNC: (ERP System – Team project)

Live: [Client didn't give permission to share live link]

Stack: Next.js, Typescript, Express.js, MySQL

- Participated in the development of a business management ERP platform for finance, operations, asset management, and reporting.
 - Developed secure authentication and user management systems with role-based access controls.
 - Built modules for company management, departments, cost centers, chart of accounts, banking operations, assets, and vehicle management.
 - Designed and implemented complex business workflows for asset depreciation, expense tracking, and financial record management.
 - Developed reporting systems including ledger reports, profit & loss statements, cash reports, asset reports, departmental reports, and vehicle reports.
 - Implemented Excel, PDF export, and print-friendly reporting features to support business operations.
 - Created analytical dashboards with charts and key business metrics for management decision-making.
 - Worked extensively with relational database design, API development, and business-critical backend logic.
-

Experience

Software Engineer – BizFlow Software Company

Nov 2024 – Present

- Developed and maintained full-stack ERP modules using Next.js, TypeScript, Express.js, and MySQL
 - Built financial and operational reporting systems (ledger, P&L, asset reports, etc.)
 - Worked with complex relational database structures and business logic-heavy systems
 - Optimized backend APIs and improved system performance for enterprise workflows
 - Collaborated with internal stakeholders to refine requirements and deliver production features
-

Education

B.Sc in Computer Science and Engineering
International Islamic University Chittagong

Additional Skills

- REST API design and integration
- Authentication & Authorization (JWT, OAuth basic)
- CI/CD basics (GitHub Actions / Vercel / Firebase Deployments)
- Cloud deployment (Vercel / Firebase / basic VPS hosting)

- AI-assisted development tools (ChatGPT, Copilot for debugging & coding assistance)
 - Familiar with scalable architecture patterns in full-stack applications
 - Database Design & Query Optimization (MySQL, MongoDB)
 - Third-Party API Integration & Payment Gateway Integration
-

Languages

- Bengali – Native
 - English – Fluent
 - Hindi – Fluent
-

Social Activities

- Volunteer of UNICEF Bangladesh.
 - Head of IT at Environment and Children Rights Save Organization.
 - Ex Graphic Designer of Computer Club IIUC.
